## Learn where to get Job Training

---

### What is job training?

Some “job training” is focused on gaining knowledge on a topic or career field, and can include completing classes in school, reading books, watching you tube videos, attending seminars, etc.

But what most people think of when they think of job training is learning technical skills related to a specific job or career. These might be things like knowing how to use Microsoft Office for an office job, or knowing how to use a level or measuring tape for a construction job.

### Where can I get job training?

1. **Community College CTE Programs** - It should be said that many community colleges have great CTE programs which will teach you a variety of skills that will help you begin a career. These programs are usually reasonably priced (or free), take less time than getting a “traditional” degree, and can sometimes connect you with employers after completing the program. These are definitely worth looking into.
2. **What if college isn’t for me?** If going to college just isn’t for you, no worries. There are a variety of programs that might be able to help give you quality job training. In southern California, there are tons of organizations that focus on this. You’ll notice quickly that they might not always be easy, but your hard work will pay off. Visit the following websites to learn more about the programs they offer and then use the info you learned to answer questions 2 and 3.
